

# ALBERTA'S HEALTH CARE BUDGET CAN'T AFFORD ANONYMOUS VIRTUAL APPS

Anonymous virtual health providers are disconnected from the rest of the health system. They don't know you or your health history, which results in unnecessary tests that drive up costs our health care budget can't afford.

So why is government paying more to get less? And why won't they cover the real cost of virtual appointments with doctors who actually know you?

Talk to your own doctor about how they can meet your virtual care needs.

And tell your MLA and other elected officials that public dollars shouldn't pay for-profit corporations to deliver care Alberta doctors are already providing.
