

# ALBERTANS NEED DOCTORS – NOT APPS

You deserve care from your own doctor – someone you know and trust. Your doctor understands your medical history and most physicians now offer both in-person and virtual appointments.

Anonymous virtual health providers don't know you or your medical history. They aren't connected to the system or other health care providers.

Talk to your own doctor about how they can meet your health care needs.

And tell your MLA and other elected officials that Albertans need doctors, not apps.

## YOUR HEALTH MATTERS TO ALBERTA'S DOCTORS
