

Where your dues go.

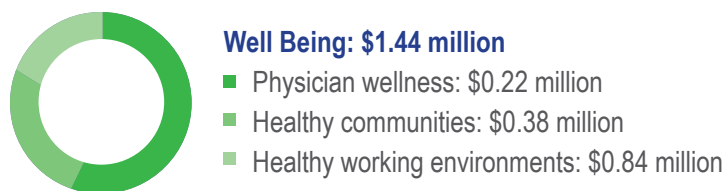

The AMA plans and budgets using a framework describing **Key Result Areas** that, together, comprise the suite of supports, advocacy and service delivered to members and on their behalf. Every membership dollar is allocated using this framework.

In light of recent developments under the UCP Government, it is important to note that administering programs has never been the purpose of membership dues. While the AMA administers its programs efficiently and in the interests of its members, the cost of program administration is covered by government funding.

The AMA assists and supports its members in maintaining their financial health. By representing and negotiating for physicians, while helping them understand the SOMB and payment models, the AMA works tirelessly to ensure Alberta doctors' financial needs are met.

- EXAMPLES:**
- Secure a negotiated agreement with government
 - Negotiations for cARP's, on-call, AHS stipends, AMHSP
 - Fee Navigator @
 - Billing services
 - Peer review

The AMA supports members in maintaining healthy work-life integration or dealing with crisis. We bring together physicians, patients and families as they work together to build healthy communities. This includes promoting policies on equity, diversity and inclusion.

- EXAMPLES:**
- Responding to the provincial Medical Staff Bylaws review
 - Championing Equity, Diversity and Inclusion Initiatives
 - Indigenous Health
 - Health Issues Council
 - AMA Youth Run Club inclusive programs
 - Empowering patient involvement in building a better health care system that demonstrates value for Albertans

Governance, systems and specific programs delivered through the AMA ensure effective delivery of the 3 KRAs, including governance, finances, knowledge, relationships and workforce.

- EXAMPLES:**
- Webinars
 - Leadership development toolkit

The AMA supports members in their role as leaders in the health care system. By working with Alberta Health, AHS and others, AMA leads and influences positive change in the delivery of service.

- EXAMPLES:**
- Implementation of the Patient's Medical Home
 - Advocacy around implementation of AHS review recommendations
 - Completion of the Income Equity Initiative studies (overhead, hours of work)
 - Responding to new contracting legislation
 - Responding to government Practice ID regulations
 - Albertapatients.ca online community
 - Indigenous Health
