

Alberta life expectancy

First Nations vs non-First Nations 2015–2021

"It is difficult to believe that this is the reality we are facing in Canada in 2023. Life expectancy for First Nations males is 18 years less than non-First Nations males and is similar to what we saw for Canadian life expectancy during the 1930s. It's unfathomable and unacceptable that this gap continues to increase."

Dr. Cara Bablitz, Chair, Indigenous Health Committee, Alberta Medical Association
