

# Waiting for appointments, diagnosis, treatment or surgery? Need a family physician?

[patientsfirst.ca](https://patientsfirst.ca)

**Alberta is facing a care deficit – a shortage of system availability and capacity. The Alberta Medical Association needs data to measure this care deficit and report to the public and our system partners.**

## We want to hear from anyone who is:

- Looking for a family doctor
- Waiting to get a family doctor appointment
- Waiting for specialist care, diagnostic tests, surgery

We will report to Albertans and our system partners on this first-hand information about patient experiences in our health care system. Good information helps us work together to make the system better.
